

Justin M. Wozniak is a Computer Scientist at Argonne National Laboratory (ANL). His research focuses on programming languages and storage systems for high-performance computers. He is closely connected with multiple scientific teams at the Advanced Photon Source at ANL and has designed streaming workflows for near-real-time X-ray scattering analysis. He holds a Ph.D. from the University of Notre Dame, a MMath from the University of Waterloo, ON, and did undergraduate work at the University of Illinois at

Urbana-Champaign in Computer Science, Mathematics, Chemistry, and Latin.
